Subject:	San Jacinto Feasibility Study Flow Simulations and Remedial Alternatives

Folks – Earl Hayter has a conflict in the afternoon, so Gary requested we move this meeting to 8:30 a.m. CDT. Hopefully, everyone can still make it.

Thanks,
David

The purpose of this call is to review the results of hydrodynamic modeling under a variety of flow regimes/design storms in different areas of the northern impoundments at the San Jacinto Site, and to review conceptual layouts of remedial alternatives for the Site FS.
